CONTENTS

Preface xi

I
DEFINITION OF A GAME
1.1 General Notions 1
1.2 Games in Extensive Form 2
1.3 Strategies: The Normal Form 4
1.4 Equilibrium n-Tuples
1.5 The Monty Hall Game
Problems

II
TWO-PERSON ZERO-SUM GAMES
11.1 Zero-Sum Games
11.2 The Normal Form
11.3 Mixed Strategies
11.4 The Minimax Theorem
11.5 Computation of Optimal Strategies
11.6 Symmetric Games
Problems

III
LINEAR PROGRAMMING
111.1 Introduction
111.2 Duality
111.3 Solution of Linear Programs
111.4 The Simplex Algorithm
1115 The Simplex Algorithm (Continued)
1116 Examples
1117 Constrained Games
   Problems

IV
INFINITE GAMES
IV. 1 Games with Countably Many Strategies
IV.2 Games on the Square
IV.3 Games with Continuous Kernel
IV.4 Concave-Convex Games
IV.5 Games of Timing
IV.6 Higher Dimensions
   Problems

V
MULTISTAGE GAMES
V.1 Behavioral Strategies
V.2 Games of Exhaustion
V.3 Stochastic Games
V.4 Recursive Games
V.5 Differential Games
   Problems

VI
GAMES WITH INCOMPLETE INFORMATION
VI. 1 Introduction: The One-Stage Signaling Model
VI.2 The Multistage Model
   Problems

VII
UTILITY THEORY
VII.1 Ordinal Utility
VII.2 Lotteries
VII.3 Commodity Bundles
VII.4 Absolute Utility
   Problems
VIII
TWO-PERSON GENERAL-SUM GAMES
VIII. 1 Bimatrix Games (Noncooperative)
VIII.2 Perfect Equilibrium Points
VIII.3 Evolutionary Stable Systems
VIII.4 Correlated Equilibria
   Problems

IX
TWO-PERSON COOPERATIVE GAMES
IX. 1 The Bargaining Problem
IX.2 Threats
IX.3 Time-Restricted Bargaining
   Problems

X
n-PERSON GAMES
X.1 Noncooperative Games
X.2 Cooperative Games
X.3 Domination, Strategic Equivalence, and Normalization
X.4 The Core and Stable Sets
X.5 Balanced Collections
   Problems

XI
STABLE SETS
XI. 1 Introduction
XI.2 Properties of Stable Sets
XI .3 Edgeworth Market Games—An Example
XI.4 A Game with No Solutions
   Problems

XII
INDICES OF POWER
XII. 1 The Shapley Value
XII.2 Multilinear Extensions
XII.3 The Banzhaf-Coleman Index of Power
XII.4 The Presidential Election "Game"
XII.5 The Coalitional Value
Problems

XIII
THE BARGAINING SET AND RELATED CONCEPTS
XIII.1 The Bargaining Set
XIII.2 The Kernel
XIII.3 The Nucleolus
XIII.4 The Airport Game
Problems

XIV
NONATOMIC GAMES
XIV.1 Games with a Continuum of Players
XIV.2 Values of Nonatomic Games
XIV.3 Internal Telephone Billing Rates—An Example
Problems

XV
GAMES WITHOUT SIDE PAYMENTS
XV.1 Introduction
XV.2 The Core
XV.3 Market Games
XV.4 Approaches to the Value
XV.5 The Bargaining Sets
Problems

XVI
SPATIAL GAMES
XVI.1 The Core and Near-Core Solution Concepts
XVI.2 The Modified Power Index
Problems

XVII
OTHER APPLICATIONS
XVII.1 Introductions
XVII.2 Single-item Auctions
XVII.3 Mechanisms
XVII.4 Public Goods
XVII.5 Two-sided Matching
Problems

APPENDIX
A.1 Convexity
A.2 Fixed Point Theorems

BIBLIOGRAPHY
Index
