Transport eBook Collection

Emerald's Transport eBook Collection provides access to high quality, international research in a wide range of transport related subjects. In 2017, three new books have been added to the Collection alongside the latest editions of two titles: **Airport Design and Operation (3rd Edition)** and **Traffic Safety and Human Behavior (2nd Edition)**
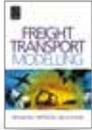

How to access

2017

Purchase perpetual access to all 47 books.

Key titles

Freight Transport Modelling

Presents insightful contributions from respected, international experts in transport economics and freight modelling. It addresses the need to develop new freight transport models and scientific tools to counter internal and external economic impacts, providing a valuable reference for researchers, doctoral students and transport decision makers in both government and industry.

The Handbook of Road Safety Measures, second edition

State-of-the-art summaries of current knowledge regarding the effects of 128 road safety measures. With many original chapters revised and several new ones added, extra topics covered in this edition include: post-accident care; Driving Under Influence legislation and enforcement; environmental zones; and speed cameras.

Handbooks in Transport, volume 2

Specially commissioned chapters from world experts on their topics, this volume encapsulates the essential knowledge of a major area within transportation.

"Edited by two of the leading figures in transportation research and dissemination, these handbooks are likely to become the essential reference work in the field." Dr John Preston, University of Oxford, UK

Fundamentals of Transportation and Traffic Operations

"...This text is a must for researchers and engineers who want the 'best' start possible. It should be recommended reading for all senior classes in transportation and traffic operations". H. Michael Zhang, University of Iowa, USA

Leading authors featured in this Collection

Kenneth J. Button,
George Mason University, USA

David Banister,
University of Oxford, UK

Eddy van de Voorde,
Universiteit Antwerpen, Belgium

Carlos Daganzo,
University of California, Berkeley, USA

Rune Elvik,
Norwegian Centre for Transport Research, Norway
