Public Policy & Environmental Management eBook Collection

Offering cutting-edge and forward-thinking research, the Public Policy & Environmental Management eBook Collection covers a wide range of key topics including risk management, conflict management, public policy analysis, climate change modelling and economics.

Key Titles

Public Policy and Governance

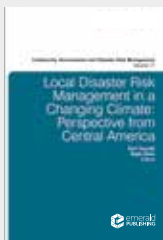

Public Policy and Governance features authored and edited monographs, written by experts in the field to present new and insightful research on a range of policy and governance issues across the globe. Recent books include analyses on educational regulation and governance; a deep dive analysis of democratic governance; and an examination of contemporary challenges facing public leaders in Asia.

Series Editor, **Professor Evan Berman**, is internationally renowned for his work on the public sector, and is the recipient of the Fred Riggs Award for Lifetime Achievement in International and Comparative Public Administration from the American Society for Public Administration.

Contributions to Conflict Management, Peace Economics and Development

This series publishes theoretical and empirical papers on conflict and peace related to economic, social and political development, primarily of the developing countries. Now in its 22nd year of publication, it covers a variety of topics centred around conflict management and resolution, including: the role of uneven distribution of resources, inequity in income distribution, social and political discrimination, poverty, and arms funding. It also examines developmental issues for their impact on conflict, such as; water resources, energy-environment, health, urbanization, globalization, and population growth.

Community, Environment and Disaster Risk Management

The series is built on field evidence and community practices, and provides specific tools and guiding frameworks with appropriate academic analysis. The series is the long-awaited missing link between academic research and field practice in the environment and disaster management field. It is essential reading for all academics, researchers and practitioners who are involved in the areas of environment and disaster risk reduction.

Series editor, **William L. Waugh, Jr**, is an Emeritus Professor at Georgia State University (USA). He is internationally recognized for his work on disaster policy and local and regional capacity-building.
