

eJournals 2020

Operations, Logistics & Quality Collection

With comprehensive coverage of the latest developments in Operations, Logistics and Quality Management, this portfolio is indispensable to both researchers and professionals in the field.

Articles in this collection were downloaded 3.1 million times in 2018 and article submissions are closely mapped against research trends to ensure published content reflects areas of current or rapidly emerging interest.

Featured Titles:

International Journal of Physical Distribution & Logistics Management

International Journal of Operations & Production Management

Journal of Humanitarian Logistics and Supply Chain Management

International Journal of Logistics Management

Topical Coverage:

- Supply chain management
- Lean Six Sigma
- Quality
- Processes
- Green supply chain
- Service management
- Outsourcing
- Technology management
- Industry 4.0
- Business process
- Multi-channel distribution
- Big data analytics
- Supply chain information systems
- Service quality
- Total quality management
- Project management
- Offshoring
- Artificial Intelligence
- Sustainable transport
- Process control
- Global operations
- Production management
- Cold supply chains
- Systems reliability
- Lean operations
- Quality reliability
- Quality control
- New distribution methods
- Manufacturing technology management
- Service theory

Special Issues:

Journal of Humanitarian Logistics and Supply Chain Management, 2018

“Logistics and SCM in the context of relief for refugees and internally displaced persons”

The purpose of this special issue on “refugee logistics” is to analyse the nature and challenges of displacement from a displaced person’s perspective. It also argues for a more critical appreciation of the role and value that research in logistics, operations and supply chain management (LOSCM) can play in the delivery of services and care for refugees and IDPs from the perspective of preparedness and logistics planning of humanitarian organisations.

Business Process Management Journal, 2019

“Knowledge transfer and organizational performance and business process: past, present and future researches”

The purpose of this special issue is to provide a contribution to the increasing interest in knowledge transfer (KT) and organizational performance and business process. In this perspective, past, present and future issues discussing the relationships between the transferability of knowledge and company performance management and outcomes emerged. Thus, the aim of this special issue is to advance existing theories in the field of KT.

Leading authors and editors:

Angappa Gunasekaran, California State University, USA.

Teaches undergraduate and graduate courses in operations management and management science and has over 200 articles published in 40 different peer-reviewed journals.

Elias Carayannis, George Washington University, USA.

He is deeply involved in the areas of strategic government-university-industry R&D partnerships, technology road-mapping, technology transfer and commercialization, international science and technology policy, technological entrepreneurship and regional economic development. As an engineer with training in management, innovation and entrepreneurship studies, his career has spanned roles as scientist, technologist, innovation economist, and entrepreneur.

Harm-Jan Steenhuis, Hawaii Pacific University, USA,

has published two books and over 130 refereed articles, book chapters and conference proceedings in the areas of international operations, (international) technology transfer and related technological and economic development.

Benjamin Hazen, Air Force Institute of Technology,

USA. Associate Professor of Logistics and Supply Chain Management in the Department of Operational Sciences at AFIT. He has published more than 65 peer-reviewed articles in leading journals.

Jiju Anthony, Heriot Watt University, UK,

is recognised worldwide as a leader in Six Sigma methodology for achieving and sustaining process excellence.
