

Emerald Journals

Citation results update 2023

Reaching beyond the restrictions of traditional subject disciplines, Emerald is committed to publishing high quality, mission-led research that inspires positive change in society and addresses real world problems.

We believe in inclusive and meaningful research evaluation

While we recognise the importance of citation metrics, we remain highly supportive of a move from measuring research excellence in purely academic terms, towards research achievement that also considers societal and economic factors.

Our [Impact Manifesto](#) that champions alternatives to traditional academic metrics was relaunched in 2022 with six new commitments for change. Our hope is that this will further advance debates around research incentives and evaluation.

Emerald is also a founding signatory of the United Nations Sustainable Development Goals (UN SDGs) Publishers Compact. This is designed to inspire action among publishers and accelerate progress to achieve the SDGs by 2030.

Quick and seamless access to all eJournal content on Emerald Insight

•
Subscription Journal articles were downloaded over 36 million times in 2021

•
Over 90% of users to Emerald Insight download content

Emerald Journal content was mentioned in the following sources last year:

3,500+ news outlets, 740+ blogs,
