

# An innovative method to reform education for sustainable development in Mexico

Mexico's five-year national development plan underscores the need for quality education to foster sustainable development

Timely reforms are essential for enhancing education for sustainable development (ESD) within Mexico's higher education system

## The Roadmap of an Undergraduate's Industrial Design Curriculum Reform in Tecnológico de Monterrey

Determining the scope of reform

Formulating curriculum interventions

Reviewing changes through focus groups

## Highlights of the reformed curriculum

Online SD learning space

Collaborative approach

Reorientation of the Industrial Design curriculum

Online learning platforms for testing interventions and collaborative ways of review can help incorporate useful changes into the ESD curriculum of higher educational institutions in Mexico
